Operation details:

Parameter	Type	Description
id	string	Operation ID

application_id	string	Application id
application_name	string	Application name
category	string	Operation category (application, manual)
order_id	string	Clients` order number
amount	string	Operation amount
fee	string	Fee from operation amount
amount_paid	string	Paid amount of operation
rate	string	Exchange rate at the moment of payment
currency	string	Currency of issued operation
currency_paid	string	Currency in which operation will be paid
status	string	Operation status
address	string	Operation address
created_at	string	Date of operation creation
updated_at	string	Date of operation change
payment_url	string	Link to the payment page
redirect_url	string	Link to the page, to which redirect from payment page will be made
transactions	array	List of operation transactions

Transaction details:

Parameter	Type	Description
id	string	Transaction ID
tx_id	string	Transaction ID in Blockchain
amount	string	Transaction amount
status	string	Transaction status
linked	bool	The transaction was linked <i>manually</i>
reject_reason	string	Reason of rejecting transaction (only with reject status)
created_at	string	Date of transaction was created
updated_at	string	Date of transaction was changed
